

Bulletin | Danfoss Turbocor Compressors

Customer Notification

B-CN-272-EN REV A

3/9/2022

SUBJECT: IGV Feedthrough Clamp Orientation

Purpose

The purpose of this bulletin is to inform our customers that we have changed the orientation of the IGV feedthrough connector clamp on our VTX Compressors. Figure 1 below illustrates the old and new position of the IGV feedthrough connector.

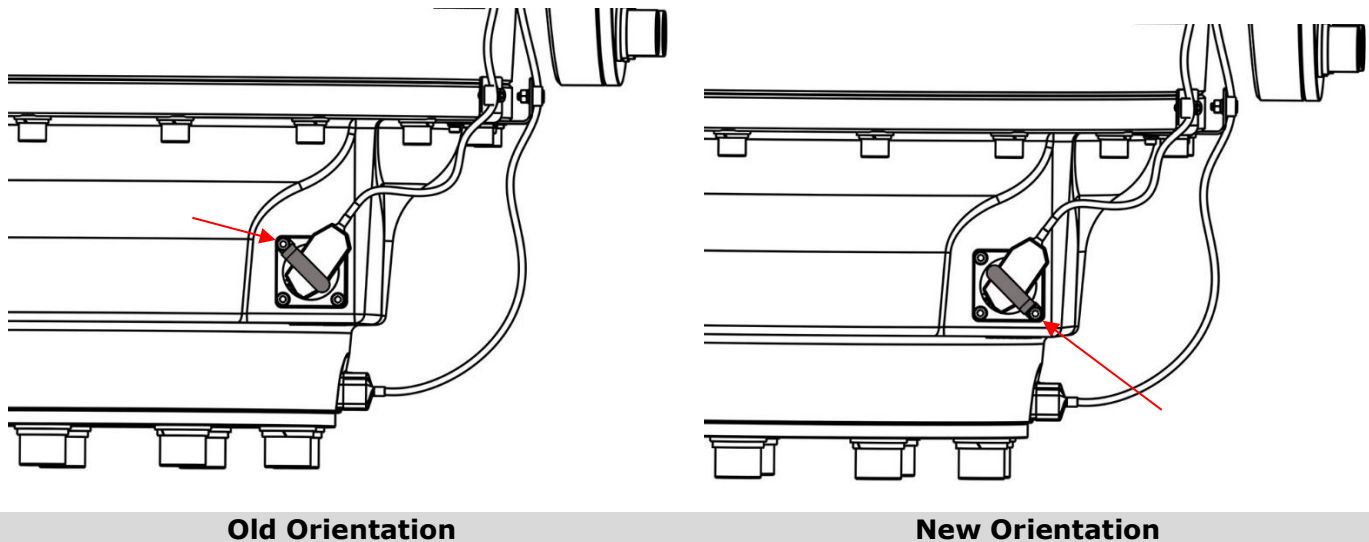

Figure 1 – Feedthrough Connector Clamp

The change of the location of the clamps was simply done to avoid the clamp catching on the packaging material when unpacking the compressor.

Summary

Our production VTX compressors have the new orientation of the IGV feedthrough connector clamp.

Action Required

No action required.
