

Customer Notification

B-CN-278-EN REV A

4/19/2022

SUBJECT: Added Supplier for TT Series IGV and End Bell Housings

Purpose

The purpose of this bulletin is to inform our customers that we have extended our supply chain source to provide our TTS/TGS Series IGV and End Bell Housings to the (TLH) Tallahassee factory. This was a proactive move to help ease supply-chain limitations that we were experiencing with the single existing supplier. This decision was to help keep our lead-times down for our customers. The added supplier for the TLH factory has already been supplying the housings for our Haiyan factory, therefore, there will be no change in the source for Haiyan factory-built compressors.

This additional source is scheduled to be in used in production somewhere between May – June 2022 (exact timing will vary). It should be noted that there will be a slight visual difference between the housings from each supplier. Refer to Figure 1 below for the comparisons.

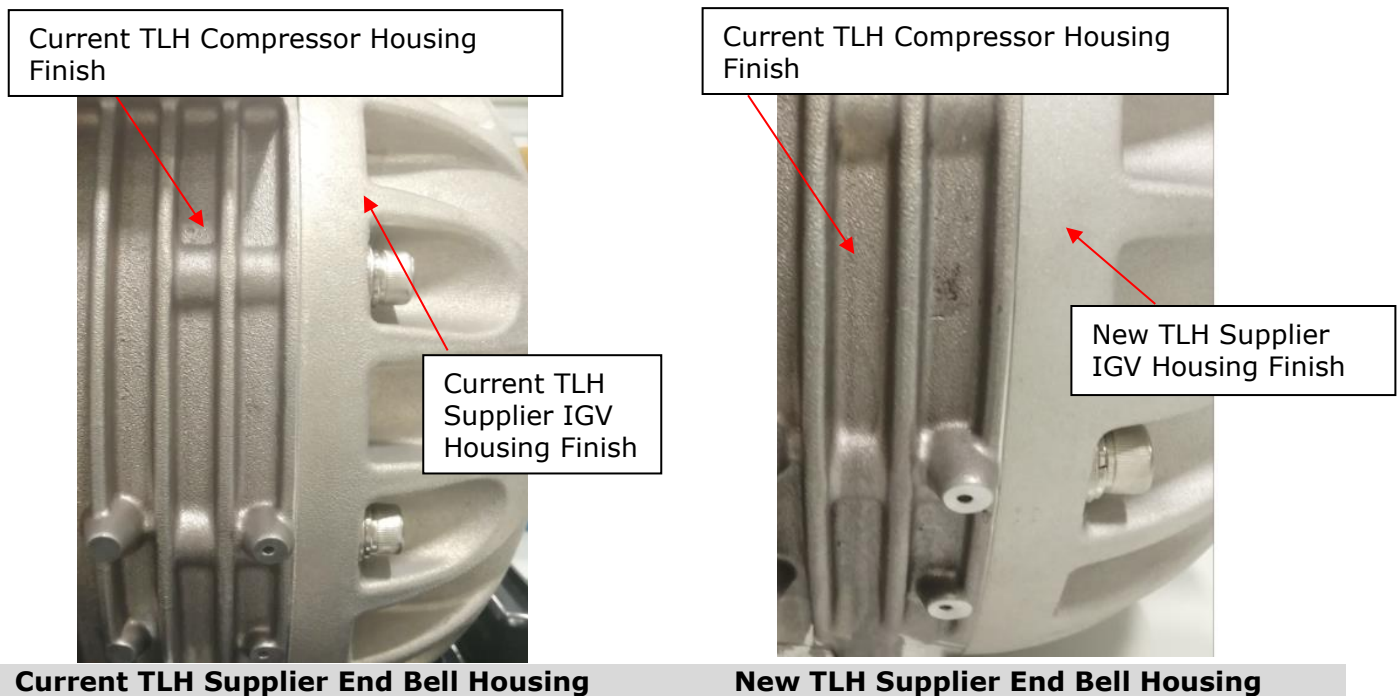

Figure 1 – End Bell Housing Comparisons

Summary

We will now be dual sourcing our End Bell and IGV Housings for our Tallahassee factory. We have added the new supplier for our Tallahassee factory to mitigate any future supply chain issues for the End Bell and IGV Housing.
